When she's not working, she enjoys traveling, reading, photography, designing and spending time with her family.

SECURE

A GOOD TEAM:

Although they come from very different business backgrounds, they have known each other for over a decade.

They bring a set of unique and complementary skills and experiences to Secure Ingress Family and are looking forward to serving the extensive, commercial, industrial and residential community.

We are dedicated to building Security Ingress as the #1 National Security Integrators for modern businesses, enterprises and residential customers through hard work, dedication to customer service and by applying family values to the work place.

ABOUT US:

Security Ingress (SI) is a full-service security organization providing best-in-class fully integrated security system technologies and support – protecting our clients most valuable resources and assets, minimizing risk exposure and safeguarding proprietary data and information.

Our programs are developed to be inclusive, end-to-end solutions which have proven to generate greatest success for clients regardless of industry.

We pride ourselves in providing top-quality service at an incredibly fast pace while maintaining family-friendly like atmosphere.

SOLUTIONS AND SERVICES:

Right from assessment, design, planning all the way to project management, installation, maintenance and annual maintenance contracts, Secure Ingress (SI) team is fully equipped with best-in-class technology and security solutions for seamless execution of our client's need. Our team of qualified technicians can be on the road in no time once we receive a service request. We stock large inventory that allows us to act fast and help secure your business. We are here for you!

OUR SECURITY SOLUTIONS INCLUDE :

- Access Control
 - Asset Tracking
 - Automatic & Manual Door Solutions
 - Building Management Systems
 - Electromechanical & Electronic Locks
 - Fire Alarm and Life Safety
 - Home Automation
 - Intrusion Detection
 - Public Address System
 - Threat Assessment
 - Time Attendance System
 - Video Door Phones & Intercom Systems
 - Video Surveillance
 - Visitor Management
- & Much More...**

ACCESS CONTROL SYSTEMS:

Access Control System allows managing access to facilities and buildings of any size or scope and helps mitigating risk in today's environment. It allows you to track and limit entry to buildings and sensitive areas of your business, providing protection for valuable information and data, and a safer work environment for employees.

Businesses are vulnerable to internal, as well as external threats. Our access control solutions can track and restrict who goes where and when. Secure Ingress (SI) is a leading security systems integrator with the most sophisticated and innovated security solutions that provide greater peace of mind in protecting property, assets and people.

Channel Partners:

- **HID, KANTECH, HONEYWELL, SOFTWARE HOUSE, ZICOM, SPECTRA, KEYSKAN, BIOSCRYPT, MATRIX SYSTEM**

02

ASSET TRACKING :

Asset tracking enables companies to reduce human error by uniquely identifying object by affixing or embedding an RFID tag. This enables workflow optimizations, real-time inventory or location services.

Our transponders can help ensure seamless audit trail and reduce losses, while enhancing stock management and processing speed. They come in a variety of configuration and provide proven performance in low frequency, high frequency and ultrahigh frequency (UHF). They are designed to withstand the sub-freezing cold temperatures to tropical heat, rain, and UV rays.

Channel Partners:

- **HID**

03

AUTOMATIC AND MANUAL DOOR SOLUTIONS:

Secure Ingress (SI) offers a comprehensive range of automatic and manual door solutions including, swing door systems, sliding door systems, actuation device, fittings for glass, wood and metal sliding doors for commercial and industrial verticals. Our door solutions are designed for industrial use and are capable of moving particularly heavy doors and gates both outside and inside.

Glass has replaced traditional materials including wood or plastic for doors in modern buildings including offices and private homes. Glass increases significance in both functional and technological aspects. Solutions made of glass can blend subtly into the architecture of a building and accentuate it. We offer a wide range of solutions for functional, optically outstanding and extremely durable sliding door systems.

04

BUILDING MANAGEMENT SYSTEMS:

Secure Ingress provides solutions allowing you to control all aspects of your building with our Building Automation Systems. Now you can get simple centralized control over different systems scattered across various buildings and sites. Improve occupant comfort, raise efficiency of employees and reduce operating as well as energy costs - all at the same time.

Channel Partners:

- DELTA CONTROLS, KMC
- EASYIO

On Site Technical Service

05

ELECTROMECHANICAL AND ELECTRONIC LOCKS:

With customers looking for best-in-class security and total security solutions incorporating digital and mobile technology, demand for electromechanical and electronic locks is clearly gone up!

Secure Ingress (SI) offer solutions that can easily integrate with customer's existing security and administrative systems. From electronic mortise locks to electric strikes and electromagnetic locks, the solutions provide an extra layer of protection and convenience.

Channel Partners:

- **SECURITRON, RCI**

FIRE ALARM SYSTEMS:

Secure Ingress (SI) specializes in providing some of the most innovative fire alarm technologies available today. Whether a customer's need is performance-based or centered on code compliance, SI's goal is to engineer solutions that provide continuous workplace safety and operational efficiency. These include applications for smoke detection, one- and two-way voice communication, elevator recall, smoke control, and critical system monitoring. SI's solutions reach far beyond system installation. System testing, preventative maintenance, web-based reporting and around-the-clock emergency service are available on all systems, not just those we install. We back up these services with trained and certified technicians who are committed to delivering unequalled customer service.

Channel Partners:

- **SIMPLEX, MORLEY, SYSTEM SENSOR, AGNEE**

07

HOME AUTOMATION:

Home Automation is a single integrated solution that allows all your home systems to be controlled by making the home control systems and electronic components you already use on a daily basis work together. This eliminates a lot of your time and effort and truly enhance the comfort and security of your daily life. Relax and entertain in a home that is more comfortable and inviting. Secure Ingress (SI) is here to create you the best home automation system for your lifestyle and family. Not only does home automation create a smart home, but it also provides safety for your family and belongings.

Channel Partners:

- ELAN, RAKO, CONTROL4

BIOMETRIC ID SEARCH

08

INTRUSION ALARM SYSTEMS:

Secure Ingress (SI) provides the latest intrusion detection and alarm system technology equipped to secure your facilities and protect your buildings' integrity. With the integration of security cameras, door contacts, motion and sound sensors, and communication control equipment, you can prevent dangerous or illegal activity as well as protect against the loss of property or inventory.

SI can seamlessly integrate alarm intrusion with your card access, IP video, and other important building systems. Video and audio verification services integrated into the alarm system provide an added layer of security and help prevent potentially costly false alarms. This integrated approach increases security and makes the entire system easier to manage and maintain.

Channel Partners:

- DSC

09

PA SYSTEMS

Secure Ingress can help create a Public Address System with the best available state of art technology. SI's aim is to give client the best solution for their announcement through PA System.

Channel Partners:

- **BOSCH**

SECURITY

MANAGEMENT

10

THREAT ASSESSMENT:

Threat Assessment helps to ensure that consistent decisions are made in high risk environments and enables large organizations and agencies to standardize processes. Our threat assessment solutions enable enterprises across various verticals to assess vulnerabilities and manage physical and cyber threats to assets, premises, processes, people and infrastructure.

11

TIME ATTENDANCE SYSTEM

Labor is your organization's most valuable asset and its most controllable expense. Yet many organizations still rely on manual, semi-automated, or disparate systems to track employee time and attendance. A time clock solution that simply tracks employee punches is only the first step, not the final destination, on the way to reducing payroll inflation and manual errors.

Our solutions are completely automated and easy to own. And they deliver the high-quality information you need to make better decisions and manage your workforce, your way.

Channel Partners:

- **ESSL, SECUREEYE**

12

VIDEO DOOR PHONE AND INTERCOM SYSTEMS

Secure Ingress can help create a safe environment using multiple video intercom solutions across various verticals

Channel Partners:

- AIPHONE

VIDEO SURVEILLANCE SYSTEMS:

Video management and video surveillance systems have proven to greatly improve security and significantly minimize risk in a variety of business sectors. Having established strong industry leading manufacturing relationships, Secure Ingress is able to provide the very best IP-based technologies to our customers operating in the education, energy, financial, government, healthcare, industrial, pharmaceutical, and property management industries.

Whether you have no surveillance, legacy analog systems or high definition IP cameras, we are proud to offer integration services and expert maintenance for virtually any business, including global enterprises.

Channel Partners:

- AMERICAN DYNAMICS, PELCO, AVIGILON, DAHUA, HIKVISION, HONEYWELL

VISITOR MANAGEMENT SYSTEM:

Automated visitor management systems ensure enhances security and meets compliance mandates for the collection and auditing of visitor data. In several facilities, visitors are still registered using a handwritten paper log and that virtually provides no security and leaves visitor information vulnerable for anyone to see. The ability to monitor and manage visitor has become a number one priority for companies of all sizes, and from all industries.

Our integrated security solutions can provide you a sophisticated, best-in-class visitor management solution. We can integrate access control, biometrics, door devices, locking mechanisms, turnstiles, card readers, video surveillance and more to address individual needs and requirements.

WHY SECURE INGRESS?

Trust in first of its kind 24/7 sales, installation, monitoring, and service providers of complete security systems for modern businesses, enterprises and residential customers. We are an innovative, technology driven and customer focused organization and committed to keep pace with the revolutions in the security industries.

SI is committed to building partnerships with our clients to allow for a true understanding of specific security objectives. The result is a practical, yet technologically-advanced security solution that delivers measurable and long-lasting value and return on investment.

All our services begin with a free security evaluation to determine your security condition and vulnerabilities, so that we can provide monitored security systems custom-tailored to your needs. Our skilled security technicians will help you through every step of the process, from selecting the right products and services for your needs, to installation, monitoring, servicing, and reporting.

SECURE INGRESS VERTICALS:
